

CHRISTOPHER HOFFMAN

UNREAL ENGINE DEVELOPER | TECHNICAL ARTIST

Pittsburgh, Pennsylvania | 412-330-8680 | ch76151@gmail.com

Game Projects: christopher-hoffman.itch.io | Portfolio: hommeyosh1.github.io/Chris-Hoffman | YouTube: The Hommeyosh

PROFESSIONAL SUMMARY

Unreal Engine developer and technical artist with an Associate of Science in Multimedia Programming, Simulation & Gaming. Hands-on experience creating Blueprint gameplay systems, AI behaviors, interfaces, animation workflows, cinematics, environments, and development tools in Unreal Engine 5. Uses Blender, iClone, Character Creator, Python, and local AI models to build 3D content and automation workflows from concept through testing.

GAME DEVELOPMENT SKILLS

- Unreal Engine 5: Blueprint visual scripting, gameplay systems, AI, UMG, NavMesh, Animation Blueprints, Sequencer, Control Rig, and Niagara
- Gameplay: Combat, targeting, health, damage, lives, respawning, pickups, checkpoints, portals, timers, stamina, minimaps, and game-over systems
- 3D and Animation: Blender, iClone 8, Character Creator 4, modeling, animation, rendering, and game-asset preparation
- Programming: Python, C, C++, Java, JavaScript, HTML, and CSS
- Content Production: OBS, Movavi, YouTube tutorials, technical demonstrations, and social-media content
- Workflow Development: Local AI integration, structured planning, testing, project validation, and reusable automation tools

SELECTED GAME DEVELOPMENT PROJECTS

UNREAL ENGINE GAMEPLAY PORTFOLIO

- Created third-person systems for health, damage, lives, respawning, melee combat, enemy AI, weapon pickups, and player interaction.
- Developed lock-on targeting, blocking, sprinting, stamina, minimaps, X-ray vision, checkpoints, portals, timers, and game-over logic.
- Built with Animation Blueprints, Control Rig, Sequencer, Niagara, UMG interfaces, AI navigation, and environment-design workflows.

GAME BRAIN STUDIOS - UNREAL ENGINE DEVELOPMENT TOOL

Ongoing independent project | 2026-Present

- Developing a local Python application that translates natural-language instructions into protected Unreal Engine planning and building workflows.
- Implemented engine and project validation, live level scanning, local AI integration, approval controls, audit logging, and restart-and-resume workflows.
- Developed and tested tools for level construction, terrain, AI, checkpoints, timers, objectives, vehicles, and gameplay testing.

BLENDER AUTOMATION AGENT

Ongoing independent project | 2026-Present

- Developing a local Python and AI-assisted application that converts text and reference-image requests into structured Blender modeling plans.
- Implemented project requirements, model reviews, trusted Blender scripts, saved projects, and reusable building workflows.

ADDITIONAL CREATIVE AND TECHNICAL WORK

- Produced Unreal Engine and Blender tutorials, technical demonstrations, and project showcases for The Hommeyosh YouTube channel.
- Designed original models and printable parts in Blender and prepared them for physical production on multiple 3D-printer platforms.
- Built a functioning drone from individual components and diagnosed issues during assembly and testing.

PROFESSIONAL EXPERIENCE

OWNER / WEB & GRAPHIC DESIGNER / COMPUTER TECHNICIAN

MC Design Studios | Pittsburgh, Pennsylvania | Present

- Design and maintain websites using HTML, CSS, JavaScript, responsive layouts, and original visual assets.
- Create logos, graphics, promotional materials, and digital content that support client brands and online projects.
- Diagnose computer hardware and software problems, perform maintenance, and resolve system issues for reliable operation.

PROPERTY MAINTENANCE TECHNICIAN / INDEPENDENT CONTRACTOR

Royal Hands | Pittsburgh, Pennsylvania | 2018-Present

- Diagnose technical problems, determine repair plans, obtain materials, and complete projects independently.
- Interpret inspection findings, correct deficiencies, and coordinate with owners, real-estate personnel, and inspectors.
- Perform electrical, plumbing, appliance, cabinetry, drywall, painting, and general property repairs.

EDUCATION

COMMUNITY COLLEGE OF ALLEGHENY COUNTY

Associate of Science - Multimedia Programming, Simulation & Gaming | 2023

Certificates: Multimedia & Game Development; Business

ADDITIONAL TECHNICAL EDUCATION

UNREAL ENGINE DEVELOPMENT AND BLENDER 3D COURSEWORK

- Completed additional coursework in Unreal Engine game development and Blender 3D production.
- Applied knowledge includes Blueprint scripting, gameplay systems, level design, modeling, materials, animation, rendering, and asset preparation.

Additional Education: Pennsylvania Real Estate Salesperson Training - The CE Shop | 2026
